NEW TECHNOLOGIES

ADOPTION OF NEW TECHNOLOGIES THROUGH THE IMPLEMENTATION OF A SUCCESSFUL PROJECT

The client is a company that creates, produces and distributes news programming, entertainment and animation, through television and other platforms, for millions of consumers around the world. In Latin America, it has the largest programming portfolio of the region. In Argentina, it has more than 850 professionals and avant-garde technology equipment that allows to develop all of the processes that originate these channels.

THE PROBLEM | DIFFICULTIES IN ADOPTING NEW TECHNOLOGIES

The client has made a well-timed technological upgrade from Oracle Forms to Java Oracle ADF of one of its most important applications. After two years of its implementation, its development team is unable to adapt efficiently to the new technology, having to reschedule many times, causing this application not to meet current business needs.

EPIDATA SOLUTION

For this project, Epidata used the following management process

Our specialists in the Consulting Services Area, made a deep and exhaustive report about the information contained in the services and applications, as well as the infrastructure of the company. With this information we were able to identify the relationships, dependencies and connection interfaces.
PROJECT NUMBERS
